

Nam Zin Cho

**Professor of Nuclear and Quantum Engineering
Korea Advanced Institute of Science & Technology (KAIST)**

This panel talk presents the state of nuclear power in Korea, including a brief history of nuclear power technology development, the main fleet of nuclear power plants in operation and under construction, and a development plan of Gen III+ PWR reactor. The talk also presents the ongoing activities in Korea in the Gen IV framework. The talk will conclude with some thoughts and challenges facing further nuclear development in Korea.
